DETAILED ACTION

Response to Amendment

1. Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.
2. In response to the Remarks/Appeal Brief received on 2/27/2008, the examiner has carefully considered the Appeal Brief. The Brief is deemed unnecessary since after reconsideration of the Declaration filed 6/21/2007. The claims are deemed to be allowable over the prior art, Yamada et al (4,491,553).

Response to Arguments

3. Applicant's arguments, see Remarks/Declarations/Appeal Brief, filed 2/27/2008, with respect to claims 1-2 have been fully considered and are persuasive. The rejection of claims 1-2 under 35 102 (b) as being anticipated by Yamada et al (4,491,553) has been withdrawn. It is deemed that the teachings of the Yamada et al are distinguished from the instant invention. While Yamada et al teaches resin composites comprising a resin and an inorganic filler, and additionally fibrillatable PTFE, Yamada et al fails to teach and is deemed not to inherently having an index Y/X of 0.1 or less as can be seen in the 6/12/07 Declaration. It is deemed said declaration sets forth all the criteria that is needed by the PTO and is relevant to the patentability of the instant claims as written. Said declaration is commensurate in scope with the claimed invention and show that Yamada et al does not possess an index Y/X of 0.1 or less. The declarations additionally show that the tensile strength is improved, which is an unexpected result. Thus the composite and the method are deemed to be distinguished over the prior art (Yamada et al).

Election/Restrictions

4. Claims 1-2 are directed to an allowable product. Pursuant to the procedures set forth in MPEP § 821.04(B), claims 3-4, directed to the process of making or using an allowable product,

previously withdrawn from consideration as a result of a restriction requirement, is hereby rejoined and fully examined for patentability under 37 CFR 1.104.

Because all claims previously withdrawn from consideration under 37 CFR 1.142 have been rejoined, **the restriction requirement as set forth in the Office action mailed on 02/04/2002 is hereby withdrawn.** In view of the withdrawal of the restriction requirement as to the rejoined inventions, applicant(s) are advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once the restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Allowable Subject Matter

5. Claims 1-4 are allowed.
6. The following is an examiner's statement of reasons for allowance: The prior art, alone or in combination, fails to explicitly teach and/or fairly suggest a resin composite and a method of making the same comprising a resin and aluminum hydroxide having an average particle size of about 50 nm or smaller, wherein the composite has an index Y/X of 0.1 or less, wherein X is an average value of intensities of aluminum characteristic X-ray measured by scanning a beam on a straight line on the composite with an electron probe X-ray analyzer and the value of Y is a standard deviation of the intensities.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Drawings

7. The drawing(s) filed 11/19/2000 are accepted by the examiner.
